

FRACTION (FCN) TOKEN

INTRODUCTION

Market Background:-

The blockchain is an incorruptible digital ledger of economic transactions that can be programmed to record not just financial transactions but virtually everything of value.

Financial and technology industries alike are combining wonderfully, giving rise to the birth of blockchain outside of its normal working conditions.

Blockchain is a distributed digital ledger designed to power and back cryptocurrencies.

Cryptocurrencies have been the top performing asset class over the last decade with its total market capitalization growing from around \$1.7 Billion in 2013 to where it stands now at \$ 1.7 Trillion. Recent months have witnessed global institutional investors - pension, hedge and endowment funds, which historically invest in diverse asset classes including stocks, commodities and real estate - invest in cryptocurrencies to diversify their investment portfolios and spread their risk.

ABOUT US

FCN TOKEN

fcn token brings sound money to the world, fulfilling the original promise of Bitcoin as "Peer-to-Peer Electronic Cash". Merchants and users are empowered with low fees and reliable confirmations. The future shines brightly with unrestricted growth, global adoption, Permissionless innovation, and decentralized development. All are welcome to join the fcntoken as we move forward in creating sound money accessible to the whole world.

Limitless

Sound money is an alternative to opaque monetary policy, one that bakes transparency and fairness into its design. Money without limits means no more asking banks-with their fees, delays, and fraud risk" for permission to use your resources as you choose. We believe endowing money with these characteristics is foundational for building peaceful and prosperous societies.

Easy to use

Whether it's your pay check, pension or piggybank savings, money matters to us all. The ability to freely acquire and use personal resources is a vital component of human dignity and a fundamental human right. That's why we stand for sound money without limits.

What we're doing about it

Our products make cryptocurrencies like Bitcoin, Ethereum more accessible. Individuals can buy, use, and store them securely with digital wallet and financial services. Businesses get access to the tools they need to accept cryptocurrency payments. Developers get support building technologies that promote financial inclusivity. Everyone who visits Bitcoin.com can learn about the future of money from a trusted source.

WHAT IS FCN TOKEN ?

About us

fcn token is built on the Binance smart chain and is one of the first crypto projects which is in collaboration with a real manufacturer, producing FCN TOKEN

fcn token is a loyalty token that allows holders to benefit from discounts, consumer benefits, project decisions, and reflection!

fcn token is looking to fully revolutionize the decentralized world. We have put together a team behind the fcn token project to build better technology than what is currently available today. We are more than just a DeFi token, we are the future of Defi / Decentralization and Cryptocurrency.

Goals

We believe that by accelerating the transition to adopting cryptocurrency, we can help people globally to:

Real fcn token Business

The goal of fcn token is to make investments for holders profitable by creating a successful real fcn token business.

More Ways to Earn

With the income of the fcn token sale and NFT collection, regular buybacks of FCN TOKEN tokens will take place, which will increase the price and make the investment for each holder more attractive.

Protect their identity

No central entity can compromise your identity.

WHY USE FCN token?

Global Reach

With FCN, you can send money to anyone, anywhere in the world, 24 hours a day, 365 days a year. Like the Internet itself, the network is always on. No transaction is too big or too small. And you never need anyone's permission or approval.

Control

The seizing of capital from account holders that occurred in Cyprus and nearly in Greece, demonstrated that bank deposits are only as safe as political leaders decide. Even under the best of conditions, banks can make mistakes, hold funds, freeze accounts, and otherwise prevent you from accessing your own money. Banks can also decide to block your transactions, charge you fees, or close your account without warning. fcn token gives you full, sovereign control over your funds, which you can access from anywhere in the world.

Fixed Supply

The fcn token protocol ensures there will never be more than 1,000,000,000 coins in existence. Governments constantly print money out of thin air, endlessly inflating the supply and devaluing everyone's savings fcn token has a fixed supply and therefore represents sound money.

Privacy

fcn token offers more privacy and anonymity than traditional payment systems like bank transfers and credit card payments, since it's normally impossible to know who controls a Bitcoin address. fcn token offers various levels of privacy depending on how it is used. It's important to educate yourself thoroughly before using "fcn token" for privacy purposes.

PURPOSE OF THIS PAPER

The fcn token is made up of a number of protocols and innovations. It's important to have clear documentation and technical specifications on key protocol design and implementations - for which we utilize an fcn token. However, we feel it's equally important that we help our communities to understand what we try to accomplish, the trade-offs we have made, and how we have arrived at our current design decisions. We start this document with a detailed examination of the problems that public permissionless blockchains/Coins face today and the existing solutions attempting to solve them. We hope this provides the necessary context for our readers to understand our own rationale on how best to approach these challenges, and our underlying design decisions. We then provide a high-level walkthrough of all parts of the FCN TOKEN, with a focus on how they work together to support the overall vision of the network.

Scalability, sustainability and interoperability are among the largest challenges public permissionless blockchains/Coins face today. While many projects claim to have solutions to these problems, it's important to understand where these problems come from and put solutions in the context of possible trade-offs.

FCN TOKEN ATTRACTION

New Customers:-

A growing number of patrons are choosing fcN token as a preferred payment method. They favor merchants who offer this payment option and actively seek them out.

Free Marketing and Press:-

By accepting fcN token, merchants can gain free listings in website and app directories, gaining even more customers. They can also take advantage of this new trend and generate press for their business.

The History of Bitcoin

In October 2008, Satoshi Nakamoto published the famous white-paper entitled "Bitcoin: A Peer to Peer Electronic Cash System". In 2009, he released the first bitcoin software that powered the network, and it operated smoothly for several years with low fees, and fast, reliable transactions.

Unfortunately, from 2016 to 2017, Bitcoin became increasingly unreliable and expensive. This was because the community could not reach consensus on increasing the network capacity. Some of the developers did not understand and agree with Satoshi's plan. Instead, they preferred Bitcoin become a settlement layer.

By 2017, Bitcoin dominance had plummeted from 95% to as low as 40% as a direct result of the usability problems. Fortunately, a large portion of the Bitcoin community, including developers, investors, users, and businesses, still believed in the original vision of Bitcoin a low fee, peer to peer electronic cash system that could be used by all the people of the world.

THE EVOLUTION OF TOKENISATION

Throughout the past couple of years, we have seen how the novel idea of tokenization has gone through many different forms from initial coin offerings, security tokens to present day DeFi tokens. The benefits and utilities from Tokenization assets have also changed from a fundraising mechanism (ICO's), to a method of unlocking trapped value from traditional assets (Security Tokens). More recently, this has evolved to a hybrid automated fee/governance model (DeFi tokens). Here at fcn token we have innovated with different forms of tokenization through Micro Token Offerings (FCN TOKEN) which distributed tokens based off of various requirements whether it be active participation in the community or protocol, funding, engagement, or stake amount (an evolution to the normal airdrops from other projects).

Soon we will release fcn token2.0, a new iteration of the Standard Token is action Protocol that facilitates the issuance and trading of assets that track assets on other blockchain platforms as well as off-chain. fcn token 2.0 will give users access to multi-chain assets and new financial products on different blockchains without heavy over collateralization or expensive bridge fees.

OBJECTIVES

Disintermediation

We aim to reduce the need for trusted intermediaries while increasing security, removing time and cost bottlenecks.

Connecting Businesses

By integrating a single API that makes money move faster, cheaper-and more reliable for you and your customers.

Global Reach

Our goal is to become the standard for seamless digital transactions and accessing financial services on a global scale and across borders.
